INFORMATION ON  
AVAILABILITY OF HOLOTYPE  
OF THE DESCRIBED  
TAXONS AT A PUBLIC INSTITUTION (RHOPALOCERA)

DALIBOR WEISS  
Bruselská 3, 120 00 Praha 2, Czechoslovakia

I WOULD LIKE TO ANNOUNCE that holotypes of the described geographical races *Clossiana angarensis sedychi* Weiss (1964), *Colias cocandica sidonia* Weiss (1968) and *Parnassius eversmanni magadana* Weiss (1970) have been transferred from my private collection to the National Museum collections in Prague in order to comply with the stipulation of the International Commission for Zoological Nomenclature that new taxa are invalid in the case that they are not deposited in a public institution.
